

# Wireless PresentationPro™ with Beltpack Transmitter & Headset Mic

## Model PA319M

Audio equipment needs to be rugged and dependable whether it's used inside or outdoors, hooked up to a computer, projector, media player, or for straight forward voice amplification. This is especially true for presenters in school environments where students and teachers use the equipment for a variety of purposes. Schools and districts trust the PresentationPro for these very reasons. The PA319M package includes a wireless PresentationPro, a wireless M319 Beltpack transmitter and a headset mic.

The PresentationPro is designed for quick and easy set-up with a 16-channel wireless mic (handheld or hands-free with a beltpack transmitter) and two wired mics at the same time for multiple presenters.

With an increasing number of schools installing projectors and interactive whiteboards into classrooms on a district-wide basis, there are connectors to simply plug in and go with high-quality sound which will engage all of your students. And with an increasing number of audio-related technologies used in classrooms such as videos and podcasting, having a good speaker in the classroom is essential.

The PresentationPro provide educators with high quality audio support, while seamlessly connecting to multimedia players, DVDs, and computers for enhanced visual and audio learning.

The PresentationPro is powerful enough so a single speaker can be used in each classroom, minimizing installation time and costs. It's used in classrooms, labs, cafeterias, auditoriums, meeting rooms, hotel & conference rooms, and outdoor events. Its flexibility and ability to stretch budgets are key factors behind the usefulness of the PA319.

Because it uses the same wireless frequencies with the larger and more powerful *PowerPro* (PA919) PA series (and the wireless PI39 and PA419), the PA319 uses the same wireless hands-free or handheld mics. This redundancy saves money by eliminating dedicated mic equipment needed for separate PA systems. In addition, all of these speakers can also be used at one time together for larger events by simply setting them to a common frequency.

All Presentation Pros come with a remote volume & mute control.
