**Leg Insert:** 1.115" diameter, 16 gauge cold rolled steel. Nickel/chrome plated tubing with ten punched holes to receive adjusting screw. Leg adjustment uses two self-tapping locking screws which pass completely through both upper leg and lower insert. Legs adjust to achieve 22.5"-30.5" table height.

**Chrome Finish:** Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal. Our standard is 4-6 mills (25%-50% more than our competitors) of Nickel. Glide casing and ferrule shall be constructed of durable case hardened steel; no plastic. The glide will be of full swivel design, silent and firm fitting for positive attachment and retention. All glides must make full level contact with the floor and the maximum swivel angle of the glide shall not be violated. Incorporating our exclusive glide button system available in either nylon, neoprene, steel, or wool felt bottom. Pick the right base for the floor surface. Snap on a new base for surface change or wear replacement.
