TOOLS NEEDED FOR THE JOB:

Post Hole Digger Level 10 cu. ft. of Pre-Mix Concrete Crescent Wrench 5/16" Socket Wrench

GENERAL ASSEMBLY INSTRUCTIONS

- 1. Check each piece carefully and remove any sharp projections that may have been caused by shipping.
- 2. DO NOT Tighten nuts more than hand-tight until the entire assembly is completed.
- 3. All threaded ends of bolts protruding beyond nuts should be cut off and peened over to remove any sharp edges.

SPECIFIC ASSEMBLY INSTRUCTIONS:

- 1. Mark and dig footing holes as shown below.
- 2. Assemble one center section of backstop on ground with bottom of upright posts at the front edge of the footing holes.
- 3. Hand-tighten all bolts securely.
- 4. Raise assembly into position in footing holes.
- 5. Assemble each additional section in a similar manner. Raise and attach to sections already in place.
- 6. (for 551-511 model only) Add hood sections.
- 7. Plumb and level backstop. Tighten all bolts securely.
- 8. Pour footings. Place bricks or old cement chunks below the posts to allow wet cement under the post.
- 9. Allow 48 hours for concrete to dry before using the equipment.

MAINTENANCE:

Check periodically for loose bolts and broken parts. Tighten and/or replace immediately.
