

THE SIGHTS & SOUNDS
OF EDUCATION

Hush Buddy™ Hearing Protector

Model HS-TI

Designed to fit smaller heads than larger adult-sized hearing protection, this Hush Buddy is for children who need increased quiet for sensitivity reasons (if they have heightened auditory sensitivities) or just for more focused activities such as reading.

Each one has comfortable, cushioned ear pads that go around, not resting on, the ears to block out the maximum amount of external noise. Each Hush Buddy features an industry leading noise reduction rating (NRR) of 27dB, which lets in 24.2% less sound than the closest competitive item.

The padded headband helps distributes the weight, making it extremely comfortable, even when worn for longer periods of time. There's no assembly required, just put a Hush Buddy on and it's ready to go to work.

1. Padded headstrap for extra comfort
2. Adjustable for a superior fit
3. Rugged ABS plastic earcups for extra durability
4. Specially designed earcups completely cover children's ears for maximum protection from ambient noises
