

Forum Caster Support Frame

Built for *movement*.
Designed for *flexibility*.

ONE-PERSON MOBILITY

Allows a single person to easily relocate a heavy Forum Four-Station Steel Workbench quickly and efficiently.

CONTROLLED MOVEMENT

Four heavy-duty swivel locking casters provide mobility while allowing the workstation to be secured in place.

MINIMAL HEIGHT INCREASE

Raises the workbench approx. 1.25" providing added mobility and threshold clearance while maintaining a practical working height for students.

HEAVY-DUTY PERFORMANCE

Supports large, fully configured WB2, WB4 and WB12 workbenches with a tested load capacity of up to 1,500 lbs.

Forum Caster Support Frame

Easier to *move*.

Easier to *clean*.

Easier to *reconfigure*.

The Forum Caster Support Frame adds controlled, one-person mobility, making it easier to reposition units for cleaning, maintenance and changing space needs. The mobile frame adds approximately 1.25" to the overall workbench height so students can continue to comfortably use the station.

Mobility without the height trade-off!

DESIGNED AROUND OUR WORKBENCH FOOTPRINT

Built to fit WB12, WB2 and WB4 Forum Four-Station Steel Workbenches

EASIER CLEANING AND MAINTENANCE

Raises the workbench slightly above the floor, improving access for cleaning and routine floor maintenance.

DURABLE CONSTRUCTION

Powder-coated steel construction supports the demands of active CTE and educational environments.
