

Based in Minneapolis, Minnesota, Raymond Products has been manufacturing specialty material handling equipment for over 50 years. **Made in the USA**, our emphasis on quality and service assures you of a product that will serve you for many years. Raymond Products manufactures industrial quality products that have features that set us apart from other manufacturers, such as our signature red non-mar, skid resistant vinyl coating, which cushions and protects products being transported. Every item we manufacture is re-inspected for quality at time of shipment.

No one offers a wider selection of dollies, trucks and totes to move tables and chairs. Our original Mighty King line of desk lifts, invented by our founder, are the only ones **manufactured in the USA**.

You will find our specialty dollies in most major corporations, institutions, churches, schools and hotels across the country. Whether you need to move a desk, file cabinet or hundreds of tables and chairs, we have a product to make your job easier. For the moving industry, our panel/sheet movers have become a standard.
