Tools required

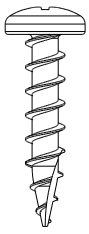

#3 Phillips Screwdriver

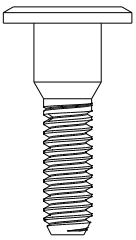

Hex Key (Included)

Hardware (Included)

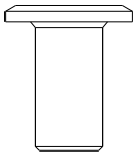

#12 x 1" Screw

A

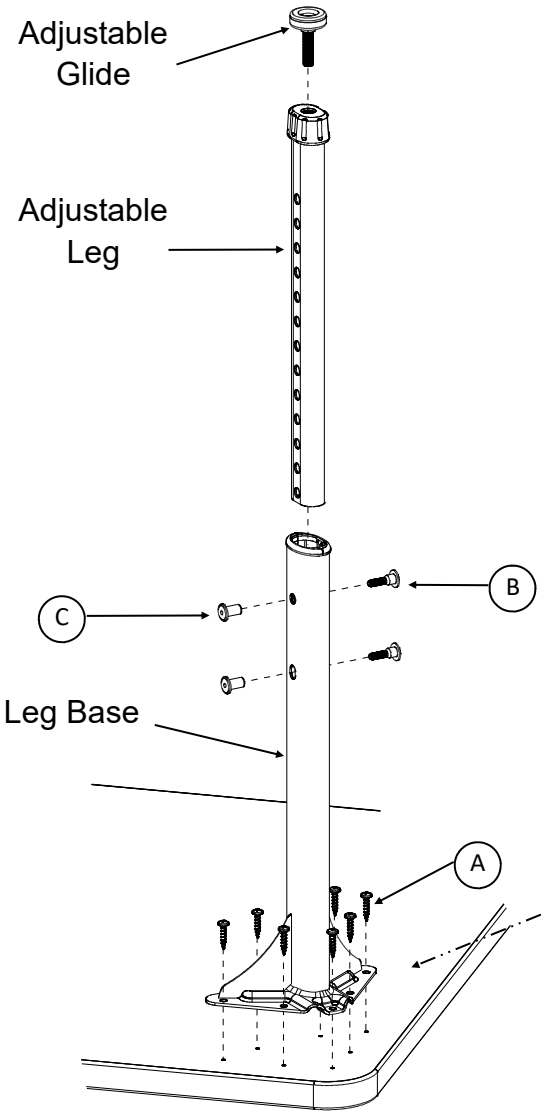

1/4"-20 Bolt

B

1/4"-20 Cap Nut

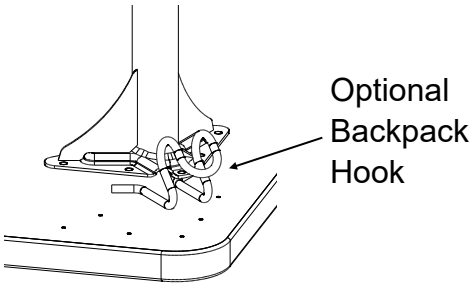

C

1. Locate pre-drilled leg pilot holes in table and position leg so that all holes are aligned.

   Optional backpack hook: The backpack hook must be installed prior to fastening the leg to tabletop as shown below.

2. Fasten Leg Base to table with (7) screws "A".
3. Repeat for remaining Leg Bases.
4. Insert Adjustable Leg into Leg Base at desired height and attach with (2) Bolts "B" and (2) Cap Nuts "C". Tighten with hex key wrench.
5. Repeat for remaining legs.
6. Screw in Adjustable Glide to each leg.

Optional backpack hook is placed between the table and leg prior to fastening. Align hook with recess in leg plate.
