TRANSFOLD™ CHORAL RISERS - STANDING

Ready to Go, Wherever Your Choir Performs

Built-in wheels make it easy to roll the TransFold unit from the classroom to the auditorium or up stairways and on to a bus or van. Upon arrival at the performance venue, your TransFold risers set up in seconds, so that they will be ready when you are. Midwest's exclusive, gas-spring assisted design allows the unit to open with moderate foot pressure, taking the strain out of set up. This also ensures a safe, controlled motion when folding the unit for transportation and storage.

TF SR72 Reverse Unit
TFSB Back Rail

To fold the unit for transportation and storage, activate the upright lock release and gently push the unit horizontally. The gas spring cylinder assures a safe controlled motion.

Drop-in couplings securely connect all units to prevent accidental movement during the performance.
