

SAFARI™ JUNGLE GYM

INSTALLATION INSTRUCTIONS: **MONKEY BARS**

EVERLAST CLIMBING™

A **PLAYCORE®** Company

MONKEY BARS INSTALLATION INTRUCTIONS

Materials Included:

Mounting Brackets

Sleeve Anchors

Monkey Bars

Tools Needed:

Drill

½" Hammer Drill Bit

Socket Wrench

Installation Instructions:

Please read all instructions thoroughly before starting to install.

1. Place Monkey Bars element on a lift in the down position. Raise the unit to the desired height that you want the element to be mounted to the wall and push the product's mounting brackets flat against the wall.
2. Hold the product firmly in place and using a ½" hammer drill bit, drill through the top left mounting holes on each of the brackets.
3. Insert two of the ½" sleeve anchors provided. Tighten them down using a socket wrench or fixed wrench. Tighten them until snug – do not over tighten. If sleeve anchor starts to spin, pull out on the bolt head to “set” the cone in the sleeve.
4. Drill holes in the rest of the mounting holes. Insert sleeve anchors in the remaining holes and tighten.
5. Repeat steps to install the remainder of the products to complete your jungle gym installation.
