

Changing Tables for Accessibility

Because Every Body Deserves Access

The Sova Solace Extended-Length accessible changing table

Designed for every need, every space, and every body

The way we think about access is evolving, raising the standard for how every space should feel and function. Sova was built for that shift, bringing together design, performance, and accessibility to create spaces that welcome everyone.

Every line and detail is shaped with purpose to create something sleeker, stronger and smarter. This is design that fits seamlessly into its surroundings and elevates everything around it.

Design:

Modern & adaptable
ADA-, ASTM- and IBC-compliant

Engineering:

Patented, superior performance
and safety

Materials:

Durable, bacteria-resistant stainless
steel & high-density polyethylene

Made in the USA:

Designed, built,
and serviced domestically

Warranty and Service:

Reliable coverage and responsive
support

Sova delivers the most complete line of changing stations, redefining what accessibility looks like in modern public washrooms. From stainless steel to high-performance polyethylene, every model is ADA and ASTM compliant, designed for durability, and backed by responsive U.S.-based service and support.

The Universal Changing Table Movement

Providing safe, dignified restroom access to people with disabilities and their caregivers.

Universal changing tables are a major step in accessible design-height-adjustable surfaces that make safe, dignified care possible for people who can't use standard restrooms. Built for inclusion, they transform restrooms into spaces that work for everyone.

In the United States UCT legislation has already been introduced or passed in more than half of the country.

The most significant shift in public washrooms in a generation is underway.

With dozens of states already adopting UCT mandates, and federal buildings, airports, schools, and stadiums leading the way, accessibility standards are evolving fast. More than just building code, it's a reflection of how inclusive design is reshaping public life.

Universal changing tables aren't just a compliance requirement, they're a high-growth category driven by new federal

legislation, evolving state regulations, and rising demand from families who expect fully accessible public restrooms. As facilities rush to update their spaces, partnering with Sova's inclusive, regulation-ready solutions gives distributors a competitive edge. Now is the time to offer products that align with both legal requirements and what guests expect.

Ascent[®]

Universal Changing Table

The Ascent redefines accessibility with an adjustable-height design that puts dignity and independence first. Engineered for simple installation, easy cleaning, and lasting performance, it helps every facility become more inclusive and welcoming.

The Next Generation of Inclusive Care

- Mounts easily to most existing walls without costly structural blocking
- Convenient plug-in feature only needs a GFCI outlet / GFCI protected circuit for quick setup
- Control buttons located front and side allow for easy height adjustments, ensuring effortless transfers and comfortable positioning
- Vacuum-formed, contoured ABS changing surface offers maximum usable space and support
- Both 76" table and 70" table (with a more compact footprint for smaller restrooms) meet IBC guidelines
- Innovative automatic retracting feature stops operation and reverses direction when an obstruction (like a wheelchair) is detected
- Entire unit is IPX6 rated, allowing for thorough and safe cleaning
- The only leading UCT with a 5-year warranty

* The Sova Ascent is the only American-made adult changing table, with limited imported components. Ascent, like all Sova products, is compliant with the Build America, Buy America Act (BABA).

Ascent 76" Universal Changing Table
