

Green Screen™ Production Kit

Ages
8+

GRN-KIT

Green screens, once a staple of any special effects film studio, are now an exciting and realistic addition for any digital classroom.

The HB Green Screen Production Kit includes everything a student, a classroom or a school would need to create engaging and professional looking broadcasts, presentations and short movies.

- One 9' x 60" green screen backdrop cloth – perfect for chromakeying – the process of filming a scene, object or person in front of a pure colored screen, typically green, then replacing it with any scene or background to achieve special effects. Highly saturated, for accurate color-balancing, the HB green backdrop is ideal for use in any video project.
- One USB digital web camera – 720p HD bendable gooseneck webcam with non-slip base and built-in gooseneck microphone for optimal positioning.
- I Can Present editing software – powerful editing software with teleprompter, split screen, picture in picture, scroll text features, chromakeying and more!

With a quick and easy setup of the green screen backdrop in front of the included webcam, students will be able to create news broadcasts, weather forecasts, short reviews, virtual visits to far away places – the planets, the solar system, the Pyramids, the Amazon, the ocean depths, even time travel, all without leaving the classroom.

**Provides the power to inspire, create and perform.
So versatile, it can be used for any age and curriculum.**

green screen

Software Features

- Import images, slides (e.g. PowerPoint and Keynote) or PDFs
- Easily add any background
